

Cod. Art. :
AP4297

ELECTRICAL BLOOD DONOR/THERAPY ARMCHAIR WITH ADJUSTABLE HEIGHT

A new level for professionals

Experience and passion, combined with technology and craftsmanship, have generated AP4297, a state-of-the-art armchair that once again certifies Givas quality.

Seamless, fireproof and antistatic upholstery, with special paddings that fit perfectly to the body shape of each patient, infuse optimal relaxation so as to facilitate any type of therapeutic treatment.

Each function is electronically controlled through a hand control and a high-precision foot control: this allows doctors to operate in total freedom and maximum hygienic conditions.

AP4297 is therefore ideal for use in clinic and hospital settings, with the double advantage of facilitating the various therapeutic treatments, while constantly guaranteeing maximum comfort to the patient, in the positions required by operational needs.
